There’s something Niu on the horizon in home design and construction and it’s 100% PNG Made.

PNG Forest Products (PNGFP) is proud to introduce Niu Homes, an exciting range of home designs that offers quality, affordable housing and is perfect for modern, tropical lifestyle.

From executive retreats, family homes and village homes, right through to commercial properties, the Niu Homes team has the right design for you.

**Niu Homes Range**

Niu Homes offers an impressive range of unique executive and village homes as well as commercial buildings designed to suit our environment.

With the focus on indoor/outdoor living, Niu Homes are ideal for the tropical lifestyle, with floor plans ranging from 20m² - 220m². The dedicated Niu Homes team will design contemporary and versatile homes to ensure your specific requirements are met.

**Niu Homes Quality Standards**

With Niu Homes you can be assured that only quality products and materials will be used to create your home.

All timber components are treated to AS standards, utilizing 100% sustainable and renewable PNG plantation pine that is fully termite resistant.

Niu Homes utilizes quality roofing and installs only the best plumbing, electrical and hardware fittings and fixtures to maintain the integrity of its product throughout your new home.

A complete furniture package with contemporary laminated styles or traditional solid timber furniture is available to complement your choice in home design, options and colours.

I am proud to introduce you to a new division of PNG Forest Products. PNGFP has a long history in Papua New Guinea. Over the years the company has grown from strength to strength and today our operations have expanded to cover the entire South Pacific region.

As you will see we offer a diverse range of quality products backed by the expertise of our team and a strong commitment to customer service.

If you require building infrastructure for the mining, exploration, infrastructure, primary industry, tourism or community sectors, or want innovative residential housing options, the PNGFP range of prefabricated buildings and complementary timber and plywood products is your solution.

PNGFP can help you all the way from building design and product delivery, to construction and fit-out.

We look forward to talking with you soon.

Tony Honey
Managing Director

A message from the Managing Director

Building on a proud history

The proud history of Papua New Guinea Forest Products (PNGFP) began many years ago in the gold fields of Bulolo. There, in the late 1920s, the large scale alluvial mining company, Bulolo Gold Dredging Limited, operated several dredges in what was then the world’s largest gold field.

As mining operations scaled down, a plywood factory and sawmill were constructed and pine plantations were planted.

So a new industry was born.

The vision and hard work of its founders saw it grow to the 1950s when the company first commenced the conversion of both hardwood and plantation resource to high value end products. In 1954, plywood production and exports to overseas destinations commenced.

PNGFP continues this work today as the country’s leading timber and plywood producer, now using only 100% renewable plantation pine. The broad product range includes prefabricated houses, dressed timber and mouldings, treated power poles, export high grade plywood and veneers.

A Commitment to Quality

Niu Homes is committed to the very same standards of quality established by PNG Forest Products. It utilises and applies the significant products and resources offered inhouse by PNGFP to produce PNG Made buildings designed to suit your needs.

- PNGFP offers PNG’s only fully CCA/ACQ pressure treated kitset buildings engineered to the most stringent PNG and Australian building code standards and using sustainable PNG plantation pine.
- PNGFP has Australian ‘Department of Industry’ Certification & Registration (Plant Number 765 01) for the treatment of CCA/ACQ pressure treated plantation pine to provide durable and protected timber for every type of project.
- Sawn and round timber is randomly and rigorously tested by TimTech Chemicals Ltd in Australia and the Timber Training Institute in Lae to ensure compliance with PNG building standards.
- As a member of the Engineered Wood Products Association of Australasia (EWPPAA), PNGFP conforms to the most stringent standards monitored and audited regularly by independent engineers.
- Only AS quality roofing, electrical, plumbing and other hardware components are included in PNGFP’s prefabricated buildings to ensure product integrity.
- Fire rated external cladding, internal linings and floor coverings are used in PNGFP’s prefabricated buildings whilst maintaining good acoustic properties.
- The PNGFP project management and quality assurance teams ensure a successful project outcome from pre-design to completion while the designers and engineers create products which are cost effective, user-friendly and serviceable even in the remotest areas.
