ENGINEERED WOOD

JAS-ANZ
G

PNGFP is a manufacturing member of the Engineered Wood Products Association of Australasia which operate a rigorous Type 5 certification program under the controls of the peak accreditation body JAS-ANZ.

PEFC PEFC/01-31-408

PNGFP has achieved PEFC Chain of Custody accreditation on the basis of 100% controlled wood. PEFC promotes a Chain of Custody system that tracks the wood source to the final product, ensuring that the wood contained in the product originates from sustainably managed forests and demonstrating our strong commitment to social responsibility.

FEATURES OF THE PLYDOME

- Modular construction with 3, 4 or more arches
- Flat-pack clip lock honeycomb plywood building system with strong structural properties
- Plywood floor platform included / verandah optional
- Thermal insulation benefits of natural timber with air pockets to enhance thermal properties
- Easily assembled in under 3 hours with just a hammer or piece of wood
- Produced from renewable pine plantation timber, processed with hydro powered facilities
- Preservative pressure treated for full protection from fungal decay, rotting and termites
- Manufactured under an ISO 17065 Type quality system
- Custom fitted tarpaulin cover with zip windows & door
- Arch dimensions of 4.8m wide x 2.884m high in modular units 1.18m long
- Arch constructed entirely of 7mm plywood
- Modular arches are clipped together with "butterfly clips"
- Flexible system from 3 arch units to long "tunnel buildings"

LOGISTICS

32 x 3 units per 40ft container

EXTRAS

Each unit comes with 1 x 5 watt solar panel PLUS 1 x LED Light

COVER

Tarp projected to last 12 - 18 months
